

WUS Community,

We'd like to share a clarification and an exciting update regarding our new pool facility. In one of our recent videos, a statement about the pool timeline may have caused some confusion. After further discussions with our contractors and a detailed review of the construction schedule, we want to provide the most accurate information possible: the new pool facility is anticipated to be completed in the summer of 2027, with plans to be fully operational by the 2027-2028 school year.

We know our community is eager to dive into this incredible new space, and we share your excitement! Construction continues to move forward, just last week, our contractors installed spectator benches inside the structure.

Thank you for your continued patience, trust, and support as we work to deliver a high-quality pool facility that our students and community can take pride in for years to come.
